**IN EVERY ISSUE:**

- Development and application of advanced materials
- Materials manufacturing and processing technology
- Materials characterization and testing
- Commercialization of advanced materials
- Introducing advanced material products & technology to new markets

Categories of materials covered include nano, electronic, optical, coatings, films, laminates, conductives, dielectrics, composites, ceramics, alloys, fibers, plastics, resins, catalysts, additives, abrasives, adhesives, thermal and engineered materials, electrochemical and energy storage materials.
